

CLIPS++ contribution within the C-STAR II consortium

Hervé BLANCHON
CLIPS-IMAG
herve.blanchon@imag.fr

Road Map

- ✦ The CLIPS++ group
 - Teams, translation approach, components
- ✦ The demonstrator
 - Architecture, Interface
- ✦ July 22th demonstration
 - Scenario, outcome, media coverage
- ✦ Conclusion & perspectives

The CLIPS++ partner

✦ Joined the consortium in September 1996

Choosed Translation Approach

Components for French

- ✦ Speech Recognition CLIPS-GEOD
- ✦ French → IF CLIPS-GETA
- ✦ IF → French LATL
- ✦ Speech Synthesis LAIP
- ✦ Integration CLIPS-MULTICOM

Components: Speech Recognition

- ✦ Run-on Speaker Independent
 - 10k words vocabulary (centered on the domain)
 - Spontaneous continuous speech
- ✦ Client-server architecture
 - Use of light clients over the network
- ✦ Based on JANUS III toolkit
 - in collaboration with Karlsruhe and Carnegie Mellon Universities

Components: Speech Recognition

- ✦ Markovian acoustic model
 - Trained with 20 hours of continuous speech (BREF-80 corpus)
 - Context independent
- ✦ Stochastic language Model
 - Trained with a 140 million words corpus
 - Optimized for the tourism task

Components: French → IF

- ✦ Developed with Ariane-G5
 - MT systems generator (toolkit)
 - 5 Specialized Languages for Linguistic Programming
 - Under VM/ESA/CMS
- ✦ Currently running on 3 sites
 - IBM 9221-130 (3,5 mips) at the CLIPS, Grenoble
 - IBM 9672-R14 (40 mips) at the CCSJ, Marseille
 - IBM 9672-RX5 (60 mips) in Montpellier (**IBM sponsoring**)

Components: French → IF

✦ Word spotting + local syntactic analysis

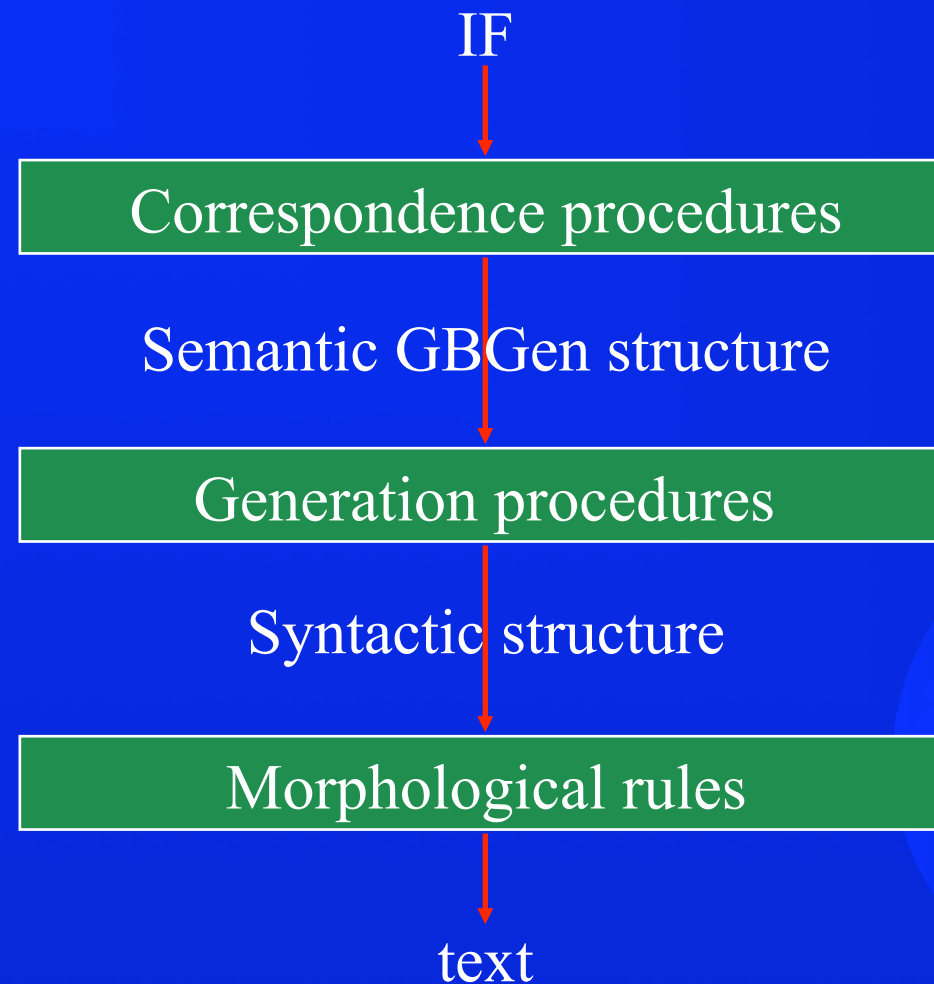

- **Input:** orthographic transcription of the spoken utterance
- Morphological analysis & lemmatization of the word
- First French → IF transfer dictionary look up
- Local syntactic analysis for semantically useful data
 - ◆ Dates, quantity, numbers, price
- Second French → IF transfer dictionary look up
- Syntactic generation of the IF
- Morphologic generation of the IF
- **Output:** IF text

Components: IF → French

- ✦ Partly developed with GBGen
 - Syntactic generation module with broad lexical & grammatical coverage
 - Deterministic system based on a generative grammar
- ✦ From an IF to a natural language text
 - Correspondence between the IF and a GBGen semantic structure
 - Generation independent from the application.

Components: IF \rightarrow French

Components: Synthesis

- ✦ LAIPTTS : a rule-based TTS synthesizer
- ✦ 3 modules
 - Conversion “text towards phonemes”
 - Prosody generation
 - Signal generation

Components: Synthesis

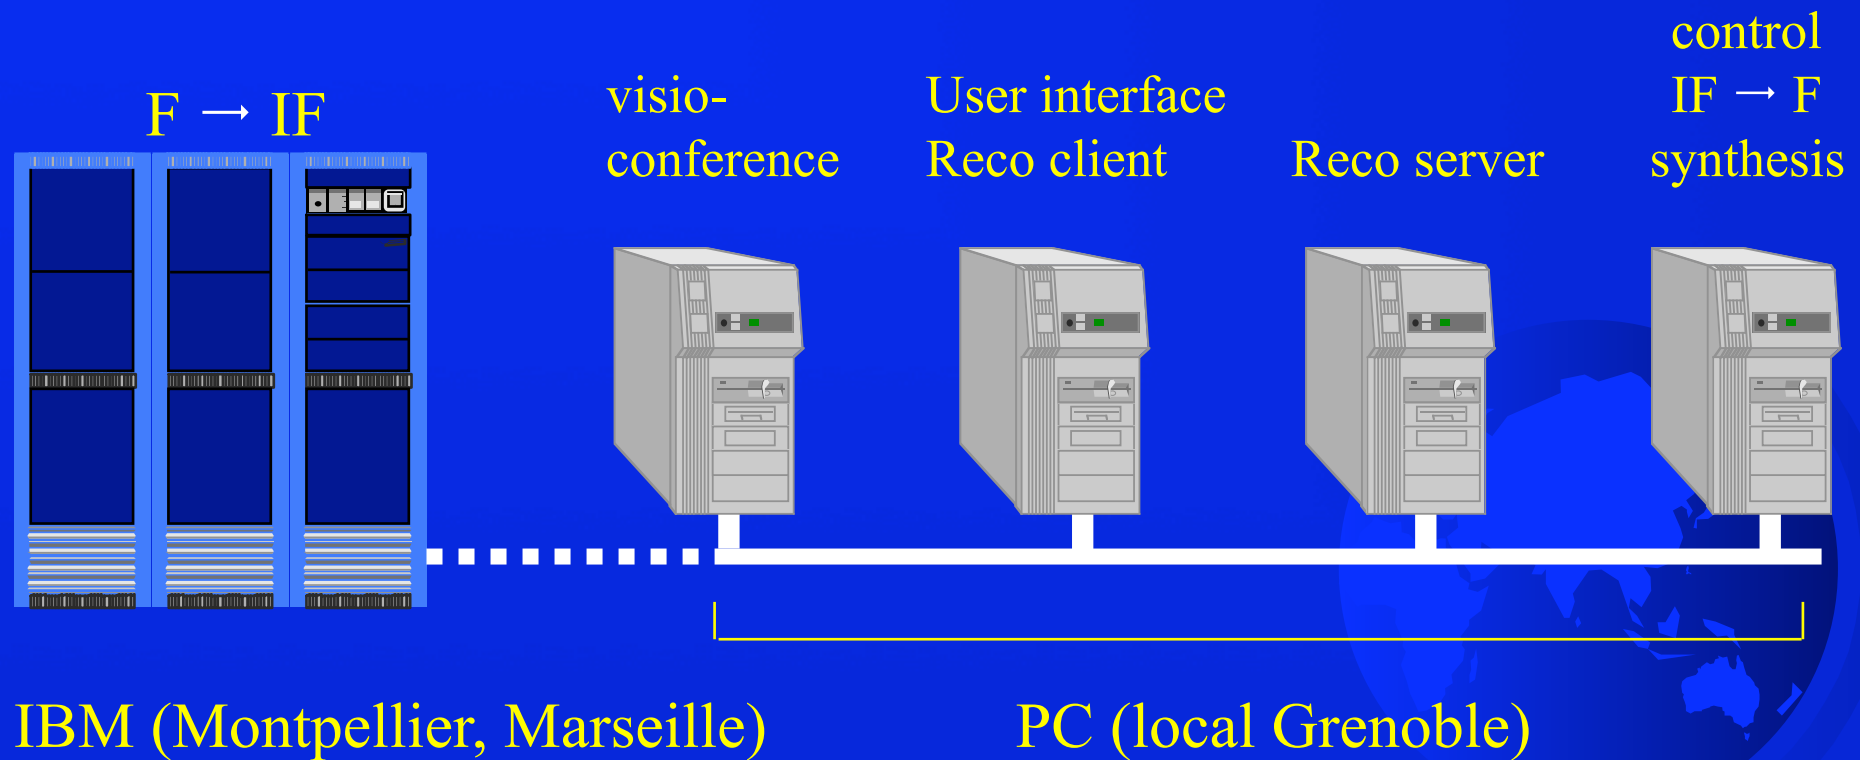

- ✦ Conversion “text towards phonemes”
 - General (540) & specialized (numbers, abbreviations, fixed formulæ, etc.) rules
 - General (7000 words) & specialized (proper nouns) dictionaries
- ✦ Prosody generation
 - Psycho-linguistic rules
- ✦ Signal generation
 - Mbrola technique from the Mons University

bonjour ici hervé blanchon j'appelle de grenoble

IF locale

c:introduce-self(person-name=(given-name=herve,family-name=blanchon),origin=grenoble)

 Client

FRA : Bonjour. Ici Herve Blanchon depuis Grenoble.

COR : Bonjour. Ici Kyuwoong Hwang depuis la Corée.

USA : Bonjour. Ici Chad Langley depuis les Etats-Unis.

ALL : Bonjour. Ici Monika depuis l'Allemagne.

{a:greeting} {a:introduce-self (person-name=(given-name=monika), origin=germany)}

COR : Hello. This is Kyuwoong Hwang from Korea.

USA : Hello. This is Chad Langley from the United States.

USA : 안녕하세요. 저는 입니다.

ALL : Hello. This is Monika from Germany.

ALL : Hallo, hier ist Monika aus in Deutschland.

ALL : 안녕하세요. 저는 입니다.

Lausanne

July 22nd's demo scenario

- ✦ Opening with all synthesis on
- ✦ Trip to Taejon
- ✦ Trip to New York
- ✦ Trip to Heidelberg
- ✦ Thanks to the travel agents
- ✦ About 30 minutes
- ✦ Travel agent for ETRI

July 22nd's demo outcomes

- ✦ Audience and sponsors were very satisfied
 - Opening ceremony was well received
 - Korean impressed people
 - Entertaining “errors”
- ✦ The overall speed was not commented
- ✦ People asked for the release of commercial applications
- ✦ Videoconference problem imposed improvisation

July 22nd's demo media coverage

- ✦ **Good** even if the date was not that good for the French media
- ✦ Press
 - National and scientific
- ✦ Radio
 - Local, National, News broadcaster
- ✦ Television
 - Local, (National)
- ✦ There is still an interest and new contacts

Conclusion & prospect

- ✦ Good results
- ✦ Very effective cooperation
- ✦ Snow ball effect
- ✦ Looking forward to technological transfer
 - Necessity to find niches
- ✦ Demo for IBM may initiate private companies' interest (27th of October with ETRI and CMU?)
